

**2026 PA LIVESTOCK
EVALUATION CENTER
PERFORMANCE TESTED
BULL SALE**

**FRIDAY, MARCH 27, 2026
NOON – SALE ARENA**

**Pennsylvania
Department of Agriculture**
Bureau of Animal Health and Diagnostic Services

1494 W. Pine Grove Road, Pennsylvania Furnace, PA 16865 | 814.238.2527 | ghubbard@pa.gov

**COMMONWEALTH OF PENNSYLVANIA
DEPARTMENT OF AGRICULTURE**

Dear Friends and Beef Producers,

Welcome to the Pennsylvania Department of Agriculture's Performance-Tested Bull Sale. We are proud to continue a tradition that has helped strengthen herds and farm businesses across the Commonwealth for more than 50 years. The Pennsylvania Livestock Evaluation Center's rigorous 112-day test program gives both consignors and buyers confidence that every bull offered represents proven performance, sound data, and long-term value.

This sale is more than an event - it reflects the strength and momentum of Pennsylvania's \$9.1 billion beef industry. It showcases our shared commitment to improving herd genetics, advancing animal health and husbandry, and building a more profitable and sustainable future for beef producers. Through strategic investments in research, market development, and agricultural infrastructure, Pennsylvania continues to earn its reputation as a trusted source for high-quality seedstock.

Today's success would not be possible without the dedication of the Livestock Evaluation Center staff, auctioneers, ring personnel, Sale and Technical Committees, and the many bidders participating both in person and online. Your professionalism and support make this program possible, and we are sincerely grateful.

We also extend our appreciation to the Center for Beef Excellence, Pennsylvania Animal Health and Diagnostic Commission, Pennsylvania Cattlemen's Association, Pennsylvania Livestock Association, Pennsylvania Beef Council, and Penn State University for their partnership and leadership. Their expertise and collaboration play a vital role in advancing our state's beef industry.

I encourage producers to take advantage of the \$1,500 grants available through the state-supported Center for Beef Excellence's Bull Credit Program. Applications will be accepted through May for qualified purchases made at this sale, and this is an excellent opportunity to invest in the future of your operation.

Thank you to our consignors, buyers, and prospective bidders for your continued confidence in Pennsylvania agriculture and for your dedication to producing high-quality beef. We wish you a successful sale and a prosperous year ahead.

Sincerely,

A handwritten signature in blue ink, reading "Russell C. Redding".

Russell C. Redding
Secretary
2026

Pennsylvania
Department of Agriculture
Bureau of Animal Health and Diagnostic Services

ANNUAL PERFORMANCE BULL TEST

Special Representatives

Honorable Russell Redding, *Secretary of Agriculture*

Dr. Alex Hamberg, *Director of Animal Health and Diagnostic Services, Dept. of Agriculture*

Dr. Troy Ott, *Dean, Penn State College of Agricultural Sciences*

Dr. Rebecca L. Krisher, *Interim Department Head, Penn State Animal Science*

Dr. Kathleen Rhoads, *Attending Veterinarian*

Darwin Nissley, *President, Pennsylvania Cattlemen's Association*

Sale Committee

Dr. Kathleen Rhoads (Technical Committee), *Att. Veterinarians, Centre Co.*

Dr. Tara Felix (Technical Committee), *Penn State Dept. of Animal Sciences*

Adam Kauf (Technical Committee), *New Enterprise, Bedford Co.*

Zach Hart (Technical Committee), *Fort Loudon, Franklin Co*

Dr. Erin Luley, *Asst. Director of Animal Health and Diagnostic Services, Dept. of Agriculture*

Ezra Swope, *New Enterprise, Bedford Co.*

Jeff Berry, *Port Royal, Juniata Co.*

Amos Yoder, *Rebersburg, Centre Co.*

Jenna Myers, *York, York Co.*

Larry Pursel, *Bloomsburg, Columbia Co.*

Auctioneer: John Spiker, *Jane Lew, W. Va.* 304-677-0255

Ringmen: Charlie Strickler, *Banco, Va.* 540-718-7793

Scott Weller, *Staunton, Va.* 540-294-0555

Reese Tuckwiller, *Christiansburg, Va.* 308-360-3048

Sale will be a live auction with video screen of bull lots. All bulls will be available to view at the Livestock Evaluation Center prior to the auction

Sale will also be broadcast online through <https://www.liveauctions.tv/auction/5069/detail>.

Online bidding questions: 682-816-4900

2026 PA Performance Tested Bull Sale

Friday, March 27

9:30 a.m.	Bull Consignor Meeting- LEC Conference Room
10:30 a.m.	Producer Education- Penn State Extension- Sale Arena
Noon	2026 Pennsylvania Performance Tested Bull Sale

Thank You:

- **Dr. Kathleen Rhoads** for veterinary expertise and continued support of the testing programs,
- The **faculty and staff** of the **Penn State College of Agricultural Sciences Department of Animal Science** for assistance and educational support,
- **Bull consignors** and **customers** for their faithful patronage and dedication to this performance testing program, and

PennState
College of
Agricultural Sciences

Department of Animal Science

Directions to the Pennsylvania Livestock Evaluation Center:

The center is between Pine Grove Mills and the Ag Progress Days site, approximately six miles southwest of State College on PA Route 45.

Southeast – From Route 322

Take the Boalsburg/Oak Hall exit to Route 45 West. Follow Route 45 West to Pine Grove Mills. Pass through the blinking light and travel approximately 2 miles. The Livestock Evaluation Center will be on the left.

Northeast and Northwest – From I-80

Take the Route 220 West exit. Continue to Route 322 East. Travel 322 East two exits to the Boalsburg/Oak Hall exit to Route 45 West. Follow Route 45 West to Pine Grove Mills. Pass through the blinking light and travel approximately 2 miles. The Livestock Evaluation Center will be on the left.

Southwest – From I-99

Take the Tyrone/Route 550 exit. Travel approximately 1 mile and turn left onto Route 550 East. Travel Route 550 East to Warriors Mark. At the stop sign in Warriors Mark, turn right onto Route 350 South. Follow Route 350 South to Route 45. Turn left onto Route 45 East. Travel Route 45 East approximately 6 miles, passing the Ag Progress Days site. The Livestock Evaluation Center will be on the right.

General Information

1. BULL MANAGEMENT

Participating bulls completed an official 112-day performance test at the Livestock Evaluation Center (LEC) on Feb. 17. Prior to the start of the test, the bulls were allowed a 21-day adjustment period. For the test, they were fed a TMR ration of corn silage, wheatlage/ sorghum, corn, dried distillers grains, soybean meal, and additional minerals. Following test completion, the bulls were limit-fed TMR and grass hay.

2. PERFORMANCE RECORDS

Each cataloged bull features a complete performance record, found beneath the bull's pedigree.

A. PREWEANING PERFORMANCE

1. Adjusted 205-Day Weight – standard weaning weight, using delivery weight adjusted for the age of dam, to treat bulls uniformly
2. Weight Per Day of Age – weight divided by age at arrival

B. 112-DAY TEST PERFORMANCE

1. Final Weight – actual weight off-test (the average of weights taken from 2/16/26 and 2/17/26)
2. Daily Test Gain – total test gain divided by 112 days
3. Rib Fat – ultrasound measurement in inches of fat cover over the 13th rib
4. Ratios – percentile comparisons of individuals against average of breed groups. A ratio of 100 is average.

C. YEARLING PERFORMANCE

1. Adjusted 365 Day Weight:

$$\frac{(\text{Final Test Weight} - \text{Birth Weight})}{\text{Total Days of Age}} \times 365 + \text{Birth Weight} + \text{Age of Dam Adjustment}$$

2. Weight Per Day of Age – final weight at end of test divided by age in days.
3. Ratios – see above.

D. Feet Angle/Claw

A numerical rank of the foot shape and pastern/foot angle. This is a scale of 1 to 9 for each category. For Angle, 1 would indicate an extremely strait pastern and short toe, and 9 would indicate a very long toe and weak pastern. Claw shape of 1 is extremely weak and diverged, while 9 is curled or screw shape. All extreme numbers are considered unsound, while 5 is considered ideal.

E. Feed Efficiency (FE)

Each bulls feed consumption was recorded for a minimum of 42 days using GrowSafe Systems, Ltd.. FE is calculated using bulls Total Dry Matter Intake/Average Daily Gain, such that a lower number represents a more feed efficient bull.

F. INDEX RATIO

$$(.40 \times \text{Average Daily Gain Ratio}) + (.30 \times \text{Adjusted 365 Day Weight Ratio}) + (.20 \times \text{Breed Composite Index}) + (.10 \times \text{Feed Efficiency Ratio}) = \text{Individual Index}$$

Individual Index divided by the average breed index = INDEX RATIO.

3. HEALTH AND FERTILITY

Participating bulls are of sound health and reproductive status and were tested for BVD. Bulls also tested negative within 30 days of sale date for Tuberculosis and Brucellosis. Out-of-state buyers should contact their state veterinarian for prior permit when necessary.

4. FRAME SCORE

Measured hip height is adjusted to 365 days of age and converted to frame size or body type on a scale ranging from one to nine where one is extremely small or early maturing while nine is extremely large or late maturing with five being average for the British breeds and six the average for the continental breeds.

Frame Score	1	2	3	4	5	6	7	8	9
Minimum 365 Day Hip Height (in.)	41	43	45	47	49	51	53	55	57

5. EMBRYO TRANSFER CALVES

Embryo Transfer (ET) calves did not receive dam adjustments when calculating the adjusted 205-day weight.

6. PELVIC SIZE IN BULLS

The heritability of pelvic size in bulls is high at 0.60. This indicates that differences in traits may be readily transmitted to female offspring. Breed is not an important factor in pelvic size for bulls of similar size and weight. Considerable variation in pelvic size is found within breeds, so selection does cause changes in the trait. The yearling adjustment factor for pelvic size in bulls is 0.25 cm. per day. Birth weight has a low correlation with pelvic size, so the traits can be selected independently.

7. PERCENT IMF

Percentage of intramuscular fat (marbling score) has been adjusted to 1 year of age using the Beef Improvement Federation formula.

8. HORNS

Angus bulls are polled. All other bulls that are smooth polled will be listed as "PLD". Bulls with scabs or scurs will be listed as "scur" while dehorned bulls will be listed as "DH".

9. CARING FOR THE BULL YOU PURCHASE

- A. Slowly adapt purchased bulls to your feeding program in an effort to maintain optimal breeding condition throughout the breeding season.
- B. Keep young bulls away from mature bulls.
- C. Limit the number of cows bred in the first year. Older bulls may breed 20-25 cows while younger bulls may breed 10-15 cows.
- D. Ensure that your young bull receives proper nutrition through the winter months so he will continue to grow and reach his genetic potential.

NOTE:

Some sale bulls have ultrasound scan information that was not adjusted by their respective breed associations due to age at scanning. These bulls are marked with "*" at the end of the actual scan figure. These are considered actual scans.

Sale Order

All bulls will sell by breed in this order: Angus, Simmental, Hereford, Charolais, Red Angus, SimAngus, Black Hereford. Sale order within breeds will be by index ratio. Bulls are cataloged in sale order.

Calving Ease

Sale bulls may be identified as "Calving Ease Bulls." These bulls must have a calving ease direct (CED) EPD among the most desirable 35 percent and a birth weight (BW) EPD among the most desirable 50 percent of the national breed population listed for non-parent sires, or these bulls must be designated as CE by a specified breed standard number. For breeds not publishing CED, the birth weight EPD in the top 50 percent will be used. This distinction is noted in the lower right corner of a bull's pedigree in the catalog.

Health Procedures

A summary of the health-related procedures performed on the bulls offered for sale:

Pre-Admission Testing and Immunization

- All bulls accepted for the testing program tested negative for Brucellosis, Leptospirosis (five strains), Anaplasmosis (cELISA test), Bovine Leukosis Virus and the Bovine Viral Diarrhea Virus (blood test).
- All bulls received a dose of USDA-licensed products against the four common pulmonary viruses of cattle (IBR, BVD, PI3 and BRSV) and products for controlling Mannheimia hemolytica and Histophilus somnus.

Procedures after arrival at the center

- Upon arrival at the center the following immunizing products were administered:
 - One dose of inactivated IBR, BVD, PI3, BRSV and Histophilus somnus
 - A single dose of Mannheimia hemolytica product (One-Shot®)
 - Two doses of 8-strain clostridial product
 - One dose of inactivated rabies product
- All bulls have received a breeding soundness examination performed according to the standards established by the Society for Theriogenology. All bulls in the sale have received a passing classification in that examination.
- All bulls in the sale have been determined to be non-carrier status of any breed specific genetic defects either by pedigree or by genomic test through their respective breed association.
- All bulls in the sale are tested for Tuberculosis, Brucellosis and Leukosis within 30 days of the sale.

Hauling

Assistance with sale-day transportation of bulls is available on a limited basis. Many bull consignors have offered to provide transportation to their area at an affordable price. If you have questions or concerns about transportation of a bull, please contact the LEC prior to sale.

Beef Quality Assurance

All consignors participating in the 2025-2026 Performance Test Sale are in the **National Beef Quality Assurance Program**.

Bull Videos

View video of the bulls prior to the sale at agriculture.pa.gov/lec.

Sale will be broadcast online through

USING EPD INFORMATION FOR MORE ACCURATE SELECTION

Ben Williamson
Product Manager, Premier Select Cooperative

The Expected Progeny Difference (EPD) is an expression of how future progeny of a bull is expected to perform for a particular trait compared to other bulls of his breed. It is calculated from a complex statistical procedure using the animal's own record plus that of its progeny and relatives. As technology has advanced, calculations used to create EPDs have improved and now may include the genetic makeup of the individual animal to as a means of improving its accuracy. All bulls are required to have DNA submitted to improve the EPD accuracy.

In today's era, there are EPDs that represent various traits affecting production and the bottom line of the cow herd. With so much information, how do we know what numbers to focus on? It depends on the needs of the cow herd and the traits that create revenue and ensure profitability. For example, if you sell all of your calves at weaning and are mating these bulls to heifers, you would select bulls that have high calving ease and weaning weight with low birth weight EPDs. If you are focused on creating replacement females, you may concentrate on maternal traits. Whatever your needs, you will focus on that information.

With no single trait encompassing every need for your operation, it can become challenging to balance all of your selection needs. To aid in simplifying this task, several breed associations have created economic indexes for both maternal and terminal focused production. These indexes take into account several traits that ultimately affect profitability and are weighted to the traits with the most influence. Like all selection practices, this one number still does not enable us to have one point of focus but can aid making all the data easier to interpret.

To include genetic merit into ranking the bulls on test, we have included each breed's Combination Index into our equation. A Combination Index incorporates all the genetic traits that we validate through the test, including post-weaning performance and carcass traits, as well as maternal traits. As a result, there is a greater spread in the bulls' performance index. As always, the bull with the highest performance index may not be the best fit for your operation's needs and goals. Focus on the information that will aid in the improvement of your operation and add dollars to your pocket.

Terms and Conditions of Sale

1. Sale payments should be made using cash or check. Any owner of a bull qualified for sale requesting that payment be made in cash rather than by check must first do so in writing to the Pennsylvania Department of Agriculture Livestock Evaluation Center prior to sale day. This condition will then be announced prior to the sale of that animal. All checks must be made payable to "**John L. Spiker Auctions LLC.**" No bull may leave the premises until properly paid for.
2. Each bull will be sold to the highest bidder.
3. The auctioneer will settle any disputes regarding bids that may arise. This decision will be final.
4. Certificates of registry, where applicable, will be furnished and transfers will be made by the sale committee, at the seller's expense, to the purchaser within a reasonable time after the sale.
5. All bulls are at the seller's risk until sold and will be the buyer's risk after the sale. However, if not convenient for the buyer to remove the bull the afternoon of the sale, he will be cared for up to a maximum of 72 hours after the sale at the buyer's risk. After 72 hours there will be a nominal fee.
6. Health certificates will be furnished by the Pennsylvania Department of Agriculture.
7. All bulls are guaranteed breeders by the sellers only if properly cared for and not turned out for pasture breeding before the age of eighteen months. Any bull settling one-third of the healthy cows he breeds will be deemed a breeder. In the event a bull is determined to be a non-breeder, he may be returned at the buyer's expense within 6 months of the sale date or three months after the bull sold reaches the age of 18 months, whichever occurs later. In the case of a bull claimed to be a non-breeder, the seller is entitled to six months following the return of the bull in which to demonstrate that the bull is a breeder. If in that time the bull proves to be a breeder, he shall be returned to the buyer at the buyer's expense. If after testing the bull, he proves to be a non-breeder, the buyer and seller may make any settlement that is agreeable to both parties. However, the return of the full purchase price will in any case be deemed full satisfaction and settlement.
8. All consignors subscribe to the Code of Fair Practices as established by their respective breed associations.
9. All claims for refunds or adjustments for any reason must be made in writing within six months of the sale date. The return of the full purchase price in any case will be deemed full satisfaction and settlement. The only guarantee made by the owner is for breeding soundness or any conditions listed under the particular breed's Code of Fair Practices.
10. All bulls sell with full possession and full semen rights unless otherwise noted.
11. The above guarantee and terms of sale shall constitute a contract between the buyer and the seller for each bull sold and shall be equally binding upon both. Neither the Pennsylvania Department of Agriculture, the Pennsylvania State University, the Pennsylvania Cattlemen's Association, the John L. Spiker Auctions LLC, nor any other person or organization connected with the management of the sale assumes liability, legal or otherwise, except to help make any needed adjustments.
12. All persons attending the sale do so at their own risk. Neither the Pennsylvania Department of Agriculture, nor any other person or organization connected with the sale will assume liability, legal or otherwise, for the safety in the buildings, on the premises or behavior of the animals.

Asian Longhorned Tick and *Theileria orientalis*

A Growing Risk for PA Cattle

Asian Longhorned Tick

(*Haemaphysalis longicornis*; also known as ALT)

- Invasive species first recognized in the United States in 2017
- Prefers feeding on livestock
- Females reproduce without a male, so a single tick can start a new population
- The population is nearly 100% female, so all ticks can lay eggs, resulting in massive population explosions

Photo credit: CDC

Theileria orientalis genotype Ikeda

- Blood-borne parasite of cattle transmitted by ALT
- Infected cattle often show no signs of disease, but some will develop severe anemia causing weakness, jaundice, and pale gums
- Clinical signs are the same as those of anaplasmosis

Preventing *T. orientalis* Transmission

1. If the established herd is *T. orientalis*-negative, test new cattle before entry to avoid purchasing positive animals
2. Treat new cattle with antiparasitics to reduce entry of new ticks
3. Ensure proper nutrition to strengthen immunity and prevent clinical disease

Tick Management

1. Eliminate or fence off tall grass and brushy areas on pasture to reduce tick exposure
2. Send ticks or photographs of ticks to the Insect Identification Lab at Penn State
3. Talk with your veterinarian about using systemic parasite control products for better coverage

Testing

1. Knowing herd status will allow for easier decisions when moving cattle
2. Work with your veterinarian to test animal status by PCR at the PA Animal Diagnostic Laboratory System

**No treatment available, and infection is considered lifelong;
supportive care may help recovery**

Identify
a tick.

Ask about
testing today!

Asian Longhorned Tick and *Theileria orientalis*

A Growing Risk for PA Cattle

Considerations for buying and selling safely

With *T. orientalis* genotype Ikeda, buying a positive animal can sometimes pose risks but at other times can be the safer choice. Use the guide below to help you decide.

Established Herd: NEGATIVE

Newly Purchased Animal: NEGATIVE

1. **This is a SAFE movement of cattle**

2. A quarantine is still recommended
3. Discuss retesting with your veterinarian if the source herd has any *Theileria*-positive animals
4. Treating purchased animals with parasiticide may help reduce the risk of ALT entry

Established Herd: POSITIVE

Newly Purchased Animal: POSITIVE

1. **This is a SAFE movement of cattle**

2. A quarantine and/or additional testing is still recommended for other diseases
3. Discuss herd parasiticide treatments with your veterinarian to help manage ALT populations

Established Herd: NEGATIVE

Newly Purchased Animal: POSITIVE

1. **There is an INCREASED RISK in this movement of cattle**

2. The established herd is at risk of disease
3. If any of the following are present, *Theileria* could spread quickly in the herd:
 - ALT present and cattle on pasture
 - Needles are used on multiple animals before being discarded
4. The following reduce the risk of disease transmission:
 - ALT not present or cattle kept in confinement
 - Strict single-use of needles

Established Herd: POSITIVE

Newly Purchased Animal: NEGATIVE

1. **There is an INCREASED RISK in this movement of cattle**

2. The newly purchased animal is at risk of disease
3. If any of the following are present, *Theileria* could spread quickly in the herd:
 - ALT present and cattle on pasture
 - Needles are used on multiple animals before being discarded
4. The following reduce the risk of disease transmission:
 - ALT not present or cattle kept in confinement
 - Strict single-use of needles
